

TRISOBUTYLAMINE

Product data

CAS No.: 1116-40-1
EC No.: 214-236-9
Molecular Formula: C₁₂H₂₇N
Molecular Weight: 185.35
IUPAC Name: 1-Propanamine,2-methyl-N,N-bis(2-methylpropyl)
Synonyms: Triisobutylamine
N,N-diisobutyl-2-methyl-1-propanamine
2-methyl-N,N-bis(2-methylpropyl)propan-1-amine

Applications: Intermediate for organic syntheses

PRODUCT DESCRIPTION

Form: very faintly yellow-green
Boiling point: 192-193 °C/102.66 kPa
Density: 0.788 g.cm⁻³

Specification	standard
Assay GC	98 %

SHIPPING, HANDLING AND STORAGE

- The material is packaged as requested by customer
- Triisobutylamine is a hazardous material for land, and water
- Triisobutylamine must be stored in tightly closed container in a cold, dry and well-ventilated area
