

2,3-DIAMINONAPHTHALENE

Product data

CAS No.: 771-97-1
EC No.: 212-241-0
Molecular Formula: C₁₀H₁₀N₂
Molecular Weight: 158.20
IUPAC Name: Naphthalene-2,3-diamine
Synonyms: 2,3-Diaminonaphthalene
2,3-Naphthalenediamine

Applications: Intermediate for organic synthesis

PRODUCT DESCRIPTION

Form: light brown to brown powder
Melting point: 195-200 °C
Water solubility: insoluble

Specification	standard
Assay (<i>titr.</i>)	min. 96 %

SHIPPING, HANDLING AND STORAGE

- 2,3-diaminonaphthalene is packed on request
- 2,3-diaminonaphthalene must be stored in a cool, dry place in a tightly closed container
